Frontend-focused full-stack engineer, 9+ years in production, the last four in fintech: lending, leverage, yield and risk automation. I take repositories from empty to production - frontend architecture, data layers, monorepo and CI foundations.

EXPERIENCE

2026 — now	Technical Advisor (contract) · Fintech platform, under NDA Scaffolded the monorepo and event-indexing service for a consumer investing app; built the cost-basis and PnL engine reconciling positions across six data sources.
2022 — 2026	Senior Full-Stack Engineer · Summer.fi (formerly Oasis.app) Savings product Empty repo to production as assets under management approached \$200M; yield simulation engine; institutional dashboard with two-layer auth. Pro platform Borrow / leverage / savings suite on a new infrastructure tier; risk automation with trigger cross-validation for stop-loss and rebalancing. Core app Grew a single-provider product into a multi-provider platform; first integrations for two new lending partners and their yield engines.
2016 — 2022	Full-Stack Engineer · Softax Regulated enterprise work: vehicle-leasing applications for a major automotive group, retail banking front-ends for two banks, and their back-office tools.

SELECTED PROJECTS
