

Marcin Ciarka

Full Stack Developer — frontend-focused

Warsaw, Poland

cv@plamka.net

github.com/marcinciarka

Full stack developer with 8+ years building React and Next.js applications, mostly on the frontend. For the last few years I've worked on DeFi products at Summer.fi — reading on-chain data, building transaction flows, and keeping large monorepos fast to build and ship. I care about performance and developer experience, and most of my work is public on GitHub.

EXPERIENCE

Full Stack Developer · Summer.fi (formerly Oasis.app)

Aug 2022 — Present

- ▶ Build and maintain the Summer.fi Web3 apps — Summer.fi Pro, the main Summer.fi app, and the Institutional dashboard — across several deployment targets.
- ▶ Helped choose the technology stack during the company's pivot and set up the monorepo.
- ▶ Handled project setup, CI/CD, and blockchain data integration across the apps.
- ▶ Wrote shared UI packages and a custom Turborepo remote cache on S3, cutting build times by up to ~10x.
- ▶ Reduced bundle sizes and improved load performance.

JavaScript Developer (Contract) · Efigence S.A.

Jul 2021 — Feb 2022

- ▶ Worked on the bistronaut.pl food-ordering app, mainly the mobile side.
- ▶ Adapted and optimized the app for iOS.
- ▶ Built responsive, mobile-first layouts.

JavaScript Developer · Softax Ryszard Srokosz Sp. J.

Oct 2016 — Aug 2022

- ▶ Built web applications for clients including Volkswagen Auto Group, across fintech and automotive.
- ▶ Managed deployments and ran code reviews.
- ▶ Worked with cross-functional teams to ship features.

Web Developer · K2 Internet SA

Jul 2016 — Oct 2016

- ▶ Built landing pages for automotive clients.
- ▶ Built interactive wizards and product configurators.
- ▶ Applied responsive design and current web standards.

SKILLS

CORE TECHNOLOGIES

- ▶ HTML5, CSS3, JavaScript (ES6+), TypeScript
- ▶ React, Next.js (App Router, Server Components, API Routes)
- ▶ PostgreSQL with Prisma / Kysely
- ▶ AWS (ECR, ECS, Cognito); SST for infrastructure
- ▶ WebGL — a personal interest; a handful of visual research / eye-candy projects.

FOCUS AREAS

- ▶ Web3 / blockchain data integration and DeFi front-ends
- ▶ Frontend architecture and developer experience
- ▶ Build-speed and bundle-size optimization with custom tooling
- ▶ Monorepos, Vite libraries, CI/CD; CSS Modules and Tailwind
