BA, Advertising Photography
Warszawska Szkoła Reklamy

LANGUAGES

Polish — native · English — professional

Full-stack engineer, 10 years building for the web, the last four shipping production DeFi. Technical co-founder of Supersmooth, where I started the codebase, built product with a four-engineer team, and own most of production infrastructure. I take repositories from empty to production.

EXPERIENCE

2025 — now

Technical Co-founder · Supersmooth

Product — Started the codebase; wrote ~48% of 1,648 commits on a four-engineer team. Self-custodial earn / borrow / multiply / perps on Safe accounts, four chains, seven lending protocols; PnL from entry prices read at each event's block.

Infrastructure — Owned most of production: Postgres (Kysely), all CI (5-shard tests), releases that redeploy only changed services, prod-seeded staging (indexer backfill 60 h to 20 min).

Data & AI — Indexer redeploy and reindex workflows; market data for ~15 protocols; scheduled risk jobs; OAuth MCP server giving AI agents read-only rates, portfolios and risk.

2022 — 2026

Senior Full-Stack Engineer · Summer.fi (formerly Oasis.app)

Lazy Summer Protocol — Co-built the Earn app from empty repo to production as TVL approached $200M, main contributor from 2025; vault simulation engine; institutional vault admin dashboard and its auth (Cognito, RBAC, TOTP MFA).

Summer.fi Pro — Multi-protocol Borrow / Multiply / Earn suite onto Layer 2; trigger cross-validation for Stop-Loss, Auto-Buy and Auto-Sell; typed runtime config used during incidents; dependency cleanup across 1,497 files.

Oasis.app — Grew Maker-native vaults into a multi-protocol product; first Spark Lend frontend integration; Aave stETH/ETH yield engines.

2016 — 2022

Full-Stack Engineer · Softax

Regulated enterprise work: vehicle-leasing applications for a major automotive group, retail banking front-ends for two banks, and their back-office tools.

SELECTED PROJECTS

ChainVibe chainvi.be

Multi-tenant on-chain event streaming: one server-side WebSocket fanned out to every client, with RPC failover, tx dedupe and Postgres-persisted metrics. Published as @chainvibe/components.

Bun · viem · WebSockets · PostgreSQL · React

Summer Resonance resonance.summer.fi

Live protocol telemetry you can hear: deposits, withdrawals and TVL mapped to a generative Web Audio soundscape with WebGL animation.

Next.js · TypeScript · Web Audio · WebGL
